

Table of Contents

Certification	xi
Abbreviations	xii
Glossary	xvii
Executive Summary	xxv
Volume I – Proposal Background.....	1
Part A – Introduction and Assessment Framework	2
1 Introduction	3
1.1 Introduction	3
1.2 Proposal overview.....	3
1.3 Proposal location	15
1.4 The proponent	19
1.5 Environmental record of the proponent	20
1.6 Overview of this Public Environmental Review	20
2 Proposal Alternatives, Justification and Benefits	23
2.1 Introduction	23
2.2 Alternative options	23
2.3 Why the Sandy Ridge site?.....	30
2.4 Proposal justification	36
2.5 Proposal benefits	49
3 Environmental Assessment Process.....	54
3.1 What is the purpose of the environmental assessment process?.....	54
3.2 What are the benefits of the environmental assessment process?	54
3.3 Western Australian process	55
3.4 Australian Government process	59
4 Legislative Framework.....	61
4.1 Introduction	61
4.2 Environmental Protection Act 1986.....	61
4.3 Environment Protection Biodiversity Conservation Act 1999	61
4.4 Other legislation.....	66
4.5 International conventions and treaties	70
4.6 Waste management policies.....	71
4.7 Other policies relevant to the Proposal	73
4.8 Policy, guidelines and codes of practice	75
Part B – Proposal Details and Stakeholder Consultation and Engagement	81
5 Proposal Definition.....	82
5.1 Proposal overview and key characteristics.....	82

5.2	Land use, ownership and tenure, zoning	87
5.3	Proposal lifecycle	89
5.4	Mining operations	91
5.5	Waste operations.....	100
5.6	Outline safety case.....	137
5.7	Onsite Class II landfill	141
5.8	Site access and traffic management	141
5.9	Ancillary infrastructure	142
5.10	Opening hours, workforce and accommodation	146
5.11	Closure and decommissioning	147
5.12	Environmental monitoring program	149
5.13	Institutional control period	152
6	Stakeholder Consultation and Engagement	155
6.1	Introduction	155
6.2	Consultation strategy	155
6.3	Key stakeholders	155
6.4	Cultural heritage community engagement.....	156
6.5	Community and government engagement.....	156
6.6	Future consultation.....	164
	Part C – Environmental Factors and Principles.....	165
7	Environmental Factors and Principles	166
7.1	Key environmental factors.....	166
7.2	Principles of sustainability and environmental protection.....	166
	Volume II – Environmental Assessment	170
	Part D – Approach to Environmental Assessment.....	171
8	Environmental Risk Assessment	172
8.1	Risk assessment methodology	172
8.2	Mitigation identification and residual impact assessment.....	177
8.3	Indirect impacts	178
8.4	Cumulative impacts.....	179
	Part E – The Existing Environment.....	181
9	Existing Environment.....	182
9.1	Flora and vegetation	182
9.2	Terrestrial environmental quality	205
9.3	Terrestrial fauna.....	222
9.4	Inland waters environmental quality.....	231
9.5	Human health.....	241
9.6	Heritage.....	241
9.7	Amenity.....	241
	Part F – Environmental Assessment	243

10	Assessment of Key Environmental Factors	244
10.1	Overview	244
10.2	Flora and vegetation	252
10.3	Terrestrial environmental quality	269
10.4	Terrestrial fauna.....	282
10.5	Inland waters environmental quality.....	292
10.6	Human health.....	309
10.7	Heritage.....	333
10.8	Offsets	335
10.9	Rehabilitation and decommissioning.....	337
11	Assessment of Other Environmental Factors	348
11.1	Amenity.....	348
11.2	Controlled nuclear action.....	357
Volume III – Health Safety and Environmental Management		363
Part G – Safety And Environmental Management		364
12	Management Framework	365
12.1	Environmental management policy	365
12.2	Environmental management system	365
12.3	Summary of proposed environmental mitigation	368
Volume IV - Proposal Justification and Conclusion		373
13	Justification and Conclusion	374
13.1	Justification	374
13.2	Conclusion.....	378
14	PER Technical Team	381
Volume V – References		382
15	References	383
Volume VI – Appendices		398
A.1	Environmental Scoping Document and Compliance Checklist	399
Regulatory Compliance Checklist		400
A.2	Environmental Risk Assessment	412
A.3	Flora and Vegetation Surveys	413
A.4	Geological Evolution Report	414
A.5	Soils and Materials Characterisation	415
A.6	Baseline Radiation and Metals Report.....	416
A.7	Landform Evolution Modelling	417
A.8	Terrestrial Fauna Surveys.....	418
A.9	Checklists for Biodiversity	419
A.10	Hydrology Assessment.....	420
A.11	Hydrogeology Assessment.....	421

A.12	Infiltration and Seepage Modelling.....	422
A.13	Heritage Survey.....	423
A.14	Radiation Assessments.....	424
A.15	Outline Safety Case	425
A.16	Outline Operating Strategy	426
A.17	Environmental Management Policy.....	427
A.18	Waste Facility Decommissioning and Closure Plan.....	428
A.19	Mine Closure Plan	429
A.20	Drinking Water Quality Management Plan.....	430
A.21	International Peer Review of Engineering Design of Waste Cell	431
A.22	Emergency Response Flow Chart.....	432
A.23	Engineering Designs of Waste Cells	433
A.24	Waste Acceptance Criteria and Supporting Documents.....	434

List of Figures

Figure 1-1	Regional location	5
Figure 1-2	Radioactive waste classification	13
Figure 1-3	Proposed development envelope.....	17
Figure 1-4	Access to Sandy Ridge.....	18
Figure 2-1	Western Australia’s Class IV and V landfills	40
Figure 2-2	Total hazardous waste market and the proposed waste acceptance capacity.....	45
Figure 2-3	Total hazardous legacy waste market	46
Figure 2-4	Waste sources by sector	48
Figure 2-5	Proposal benefits associated with environmentally sound management	51
Figure 2-6	Proposal benefits with the management of Class IV and Class V hazardous wastes.....	52
Figure 2-7	Proposal benefits with the management of Class IV and Class V hazardous wastes.....	53
Figure 3-1	Public Environmental Review process	56
Figure 5-1	Water pipeline route	86
Figure 5-2	Land use, tenure and zoning.....	88
Figure 5-3	Proposed Sandy Ridge Facility lifecycle	90
Figure 5-4	Conceptual layout of mine pits at year 6.....	93
Figure 5-5	Conceptual view of pit being mined and pit with roof canopy	94
Figure 5-6	Cross section of a typical mine pit	95
Figure 5-7	Stockpiles adjacent to pits/cells	96
Figure 5-8	Normal sequence of mining and waste isolation	97
Figure 5-9	Conceptual process flow diagram.....	99
Figure 5-10	Examples of the main household and industry sectors that produce waste	101
Figure 5-11	Common industrial chemical uses in Australia that produce wastes accepted for the Proposal	102
Figure 5-12	Radioactive waste classification and acceptance	107
Figure 5-11	Figure 5-13 Acceptable transport containers.....	111

Figure 5-14 Conceptual initial contact phase	115
Figure 5-15 Waste materials process flow diagram	117
Figure 5-16-Potential volume and type of waste by NEPM code that may be accepted at Sandy Ridge	120
Figure 5-17 Cell containment of chemical and radioactive wastes	128
Figure 5-18 Placement of wastes within the waste cell and a roof canopy covers the cell	131
Figure 5-19 Backfill stages.....	133
Figure 5-20 Conceptual cell profile.....	134
Figure 5-21 Radioactive waste storage (shaft in cell)	135
Figure 5-22 Conceptual design of low level radioactive waste isolation cell	136
Figure 5-23 Infrastructure area conceptual layout.....	145
Figure 5-24 Phases of closure	147
Figure 6-1 Example of communication tool around waste acceptance	160
Figure 9-1 Vegetation associations within the proposed development envelope.....	184
Figure 9-2a Vegetation types within the proposed development envelope.....	185
Figure 9-3 Daily average rainfall recorded at Sandy Ridge	208
Figure 9-4 Daily average air temperatures at Sandy Ridge recorded between May 2015 and April 2016	209
Figure 9-5 Annual and seasonal wind roses recorded at Sandy Ridge between May 2015 and April 2016	211
Figure 9-6 Annual and seasonal wind distribution at Sandy Ridge between May 2015 and April 2016	212
Figure 9-7 Land use	215
Figure 9-8 Local geology	217
Figure 9-9 Soils.....	221
Figure 9-10 Fauna habitats	224
Figure 9-11 Catchment surface water flows.....	234
Figure 9-12 Hydrogeology.....	236
Figure 9-13 Interpreted hydrogeological cross section	239
Figure 9-14 Interpreted hydrogeological cross section plan view.....	240
Figure 10-1 Surface water drainage lines, depressions and levees	260
Figure 10-2 Current and final landform	278
Figure 10-3 Predicted vertical flux of water through the existing natural weathered profile	299
Figure 10-4 Source shielding prior to placement in a concrete shaft.....	316
Figure 10-5 Backfilling complete capping of final cells in progress	321
Figure 10-6 What the landform would look like after it has been backfilled	321
Figure 10-7 Example of surface monument indicating a change in land use	322
Figure 10-8 SIBERIA model 10,000 year results for long term landscape evolution of cells	341
Figure 10-9 SIBERIA model results cross section for the original surface (top) and at 10,000 years (bottom).....	341
Figure 11-1 Nearest receptors	351
Figure 11-2 Top of Helena and Aurora Ranges Conservation Park.....	353
Figure 11-3 Mount Manning – Helena and Aurora Ranges Conservation Park.....	354

Figure 11-4 Mount Manning Range National Reserve.....	355
Figure 11-5 Previous Jaurdi pastoral station.....	356

List of Tables

Table 1-3 NORM and LLR wastes accepted on site (surface) and below ground in waste cells.....	xxxii
Table 1-1 Landfill classes and waste types in WA.....	9
Table 1-2 Hazardous wastes accepted on site (surface) and below ground in waste cells.....	11
Table 1-3 NORM and LLR wastes accepted on site (surface) and below ground in waste cells.....	12
Table 1-4 Key characteristics of the Proposal.....	14
Table 1-5 Objectives of the PER.....	20
Table 2-1 Nine potential options for base business case.....	26
Table 2-2 Alternative options considered.....	27
Table 2-3 Proposed development envelope characteristics that meet Code of Practice for the near-surface disposal of radioactive waste in Australia criteria.....	33
Table 2-4 Classification of waste and landfills in other jurisdictions of Australia.....	42
Table 2-5 Estimated legacy waste volumes in Australia.....	46
Table 2-6 Australian hazardous waste market summary.....	47
Table 4-1 Key legislation relevant to the approval of the proposed Sandy Ridge Facility.....	63
Table 4-2 Other relevant legislation.....	67
Table 4-3 Relevant guidelines and codes of practice.....	76
Table 5-1 Key Proposal characteristics.....	85
Table 5-2 NORM and LLR wastes accepted on site (surface) and below ground in waste cells.....	104
Table 5-3 Examples of NORM.....	105
Table 5-4 NORM acceptance values.....	106
Table 5-5 Examples of the industry and material containing LLW.....	108
Table 5-6 Generic concentration limits for sealed sources LLW for 100 year Institutional Control Period.....	109
Table 5-7 Limits for common sources based on NHMRC near surface code (1992).....	110
Table 5-8 Hazardous wastes accepted on site (surface) and below ground in waste cells.....	118
Table 5-9 Top 10 (<90%) of waste types likely to be accepted at the proposed Sandy Ridge Facility.....	119
Table 5-10 Example of cell scheduler for tracking of waste from sorting to placement and storage of 'like with like'.....	130
Table 5-11 Evidence supporting the proponents near surface geological repository over the lifecycle of the facility.....	138
Table 5-12 Elements of the Proposal and location of information regarding decommissioning and closure.....	148
Table 5-13 Environmental monitoring schedule summary.....	150
Table 5-14 Institutional control periods at near surface facilities.....	153
Table 6-1 Stakeholder list through the development of the Proposal.....	156
Table 6-2 Summary of consultation and engagement activities since 2012.....	161
Table 7-1 Principles of sustainability and environmental protection.....	167

Table 8-1 Likelihood of a hazard	174
Table 8-2 Consequence of a hazard	175
Table 8-3 Generic significance criteria	176
Table 8-4 Risk matrix.....	176
Table 8-5 Relative duration of environmental effects.....	177
Table 8-6 Management and mitigation measures.....	179
Table 8-7 Cumulative impact methodology.....	180
Table 9-1 Area and percentage of vegetation types within the proposed development envelope... 197	
Table 9-2 Vegetation condition rating scale	198
Table 9-3 Conservation significant flora known to occur near the proposed development envelope and likelihood of it occurring within the proposed development envelope	200
Table 9-4 Seasonal rainfall recorded at Sandy Ridge between May 2015 and April 2016	208
Table 9-5 Observed temperatures at Sandy Ridge between May 2015 and April 2016	209
Table 9-6 Drilling history in and around Sandy Ridge	216
Table 9-7 Fauna habitats within the proposed development envelope.....	222
Table 9-8 Potentially occurring conservation significant vertebrate fauna species	227
Table 9-9 Total rainfall including probable maximum precipitation	231
Table 9-10 Characteristics of catchments.....	233
Table 9-11 Contributing catchments in peak flows	233
Table 9-12 Results of permeability testing	237
Table 10-1 Summary of potential environmental impacts and predicted outcomes.....	245
Table 10-2 Impacts on regional vegetation associations.....	254
Table 10-3 Impacts on local vegetation types	254
Table 10-4 Impacts on DPAW managed lands	257
Table 10-5 Cumulative impacts on vegetation	265
Table 10-6 Disturbance areas by soil type for the Proposal	271
Table 10-7 Indicative completion criteria	281
Table 10-8 Fauna habitats to be cleared within the proposed development envelope	283
Table 10-9 Ten wettest years since 1890.....	298
Table 10-10 Monitoring bores	306
Table 10-11 Dose calculations for work activity per year.....	313
Table 10-12 Worker exposure hours	313
Table 10-13 Potential exposure dose levels	313
Table 10-14 Dose calculations for each workgroup per year	314

Table 10-18 Closure timeline	344
Table 10-19 Closure objectives, indicative completion criteria and key measurement tools.....	346
Table 11-1 Assessment of significance of potential residual impacts	359
Table 12-1 Summary of environmental mitigation and management measures.....	369
Table 14-1 Technical contributors to the PER.....	381

List of Plates

Plate 1-1 Process from the proponents drilling, to bulk pilot, to producing ceramic grade products ...	4
Plate 1-2 Process of creating the kaolin open cut pit, filling it with waste materials, and then undertaking remediation and closure	8
Plate 5-1 Ceramic and industrial uses of kaolin	83
Plate 5-2 Process from creating the kaolin mine and filling a cell with waste materials and creating recovery opportunities	112
Plate 6-1 Community consultation in Coolgardie	158
Plate 6-2 Community consultation in Kalgoorlie	158
Plate 9-1 <i>Acacia resinimarginea</i> Open Heath	183
Plate 9-2 <i>Callitris preissii</i> / <i>Acacia resinimarginea</i> Tall Shrubland	187
Plate 9-3 <i>Acacia resinimarginea</i> / <i>Allocasuarina acutivalvis</i> Open Heath	188
Plate 9-4 <i>Acacia resinimarginea</i> / <i>Melaleuca uncinata</i> Open Low Heath.....	188
Plate 9-5 <i>Leptospermum roei</i> Open Heath.....	189
Plate 9-6 <i>Acacia resinimarginea</i> Open Heath with scattered <i>Eucalyptus pileata</i> over <i>Triodia scariosa</i> Open Gr.....	190
Plate 9-7 <i>Eucalyptus pileata</i> Open Shrub Mallee over <i>Melaleuca uncinata</i> Open Shrubland over <i>Triodia scariosa</i> Open Grassland.....	191
Plate 9-8 <i>Eucalyptus gracilis</i> Shrub Mallee over <i>Acacia nigripilosa</i> subsp. <i>nigripilosa</i> / <i>Acacia burkittii</i> Low Shrubland	191
Plate 9-9 <i>Eucalyptus gracilis</i> Open Shrub Mallee over <i>Acacia acuminata</i> / <i>Eremophila oppositifolia</i> Open Shrubland	192
Plate 9-10 <i>Acacia burkittii</i> Tall Shrubland	193
Plate 9-11 <i>Eucalyptus rigidula</i> Very Open Shrub Mallee over <i>Melaleuca uncinata</i> / <i>Acacia acuminata</i> Open Low Heath	193
Plate 9-12 <i>Eucalyptus corrugata</i> Low Woodland over <i>Acacia tetragonophylla</i> Tall Open Shrubland	194
Plate 9-13 <i>Eucalyptus salmonophloia</i> Woodland over <i>Acacia tetragonophylla</i> Tall Open Shrubland	195
Plate 9-14 <i>Eucalyptus salmonophloia</i> Woodland over <i>Eremophila oppositifolia</i> Open Heath	195
Plate 9-15 <i>Eucalyptus salubris</i> var. <i>salubris</i> Open Shrub Mallee over <i>Melaleuca uncinata</i> Open Shrubland	196
Plate 9-16 The Sandy Ridge automated weather station	206
Plate 9-17 Lithological profile	218
Plate 9-18 Malleefowl mound (very old); little more than a raised patch of gravel	226
Plate 9-19 Malleefowl mound with well-defined central depression.	226
